

The soothing powers of water - The waters of our spa are naturally pure, the source being just meters from the lodge. Here three different waters converge: seawater, thermal water and water right from the waterfall. And at the Spa, you can enjoy the benefits of all three in one place. It's important to find ways to alleviate the stress of our daily lives, to find places to reenergize, and to reclaim the good feeling of well being. Here you'll be able to benefit from relaxation massages and especially from thalassotherapy treatments.
